

DID YOU KNOW?

- **Switching** to compact fluorescent or high efficiency luminaire lighting can cut electricity use for lighting by up to 75 per cent
- **Replacing** air conditioners that are more than 10 years old, can reduce energy costs for heating and cooling by up to 40 per cent
- **Fixing leaks** in compressed air systems can cut electricity use for the machine by up to 50 per cent

More than 6,000 NSW small businesses have already registered for the Energy Efficiency for Small Business program.

On average, businesses have identified electricity savings of \$1,400 and 10 tonnes of carbon pollution a year.

Power bills are going up

Build an energy efficient business

Install energy efficient equipment and get **50% off costs up to \$5,000***

Energy Efficiency for Small Business Program

savepower.nsw.gov.au

Office of Environment and Heritage

What is it?

The Energy Efficiency for Small Business Program offers **up to \$5,000** (inc. GST)* for buying and installing energy efficient equipment.

And what's more ...

Businesses get up to four hours free support to coordinate installation.

Assistance is provided to get quotes, oversee work and complete paperwork, freeing up your time to focus on your business.

So, if you are thinking about upgrading equipment such as lighting, air conditioning, hot water, insulation or commercial refrigeration, you will only have to contribute half the cost towards your energy efficiency improvements*.

What's involved?

1	Register <ul style="list-style-type: none"> • Complete Registration Form • Pay assessment fee of \$75 or \$150* 	↓
2	Receive <ul style="list-style-type: none"> • Subsidised energy assessment • Tailored Energy Action Plan 	↓
3	Choose <ul style="list-style-type: none"> • Your energy efficiency improvements • Receive up to four hours co-ordination support at no cost 	↓
4	Install <ul style="list-style-type: none"> • Give the go ahead to install • Pay only 50% of cost of improvements* 	↓
Receive a Certificate of Participation		

***Refer to Terms and Conditions**

www.savepower.nsw.gov.au/business/small-business/register-for-program/terms-and-conditions.aspx

Am I eligible?

If your business spends up to about \$20,000 (inc GST) in electricity a year OR employs up to approximately 10 full time staff, you are eligible to join the Energy Efficiency for Small Business Program.

Case study

Feel Amazing Wellness Centre

The Energy Efficiency for Small Business Program was an opportunity for the Wellness Centre to better understand its use of electricity, make changes to reduce carbon pollution and save money.

The Centre had electricity bills of \$3,560 per year – about 24 tonnes of carbon pollution a year.

They received an energy assessment, an Energy Action Plan and implemented all recommendations, saving:

- \$413 in electricity costs or 3,916 KWh a year
- 4.2 tonnes of carbon pollution a year.

The Centre received a \$1,430 subsidy to:

- replace lights with more energy efficient light globes
- switch to eco-power boards
- install a timer on the hot water system.
